FRAMING SERVICES

We offer full mounting, matting, and framing services. Photographs that are to be framed are printed on an exhibition-quality photographic rag, mounted on acid-free backer board using dry-mounting techniques, matted with acid-free mat board, and framed in a high-quality, custom metal frame. The print is then glazed with an anti-reflective, UV-Protective acrylic to ensure that your print lasts for generations to come. All prints require individual attention and must be quoted on an individual basis. Prints up to 20x30 can be framed.
